

Eco Services

ECO SERVICES (T) LIMITED

Environmental, Social, HSE & Sustainability Advisory for Energy, Mining, Infrastructure & Industrial Projects

Helping organisations manage risk, achieve compliance and deliver sustainable projects

Triple ISO Certified
ISO 9001:2015 | ISO 14001:2015 | ISO 45001:2018

Executive Summary

- Major energy, mining, infrastructure, and industrial projects succeed when environmental, social, HSE, regulatory, and stakeholder considerations are effectively managed from the outset. Doing so helps organisations reduce risk, secure approvals, attract investment, and deliver projects responsibly.
- Eco Services (T) Limited is a Category I Environmental, Social, HSE & Sustainability Advisory firm, supporting complex projects across Tanzania and beyond.
- We partner with project developers, EPC contractors, investors, development finance institutions, and government agencies to provide practical, innovative solutions that help clients manage risk, achieve compliance, and create long-term value.

Over 350

infrastructure, energy, mining, and industrial projects delivered

12+ years

of Environmental, Social, HSE & Sustainability Advisory experience

Trusted by Clients

Local expertise. Global standards. Proven project delivery

Trusted by leading energy companies, infrastructure developers, and government institutions

Why Clients Partner with Eco Services

Local Insight, Global Confidence

Deep understanding of the local regulatory environment and stakeholder landscape helps clients navigate complex requirements, build stronger relationships and reduce project risk

International Standards You Can Trust

Our Triple ISO Certified management systems align our services with internationally recognised standards, providing multinational clients, investors and project partners with consistent, reliable and transparent project delivery

CERTIFIED
ISO 9001:2015
ISO 14001:2015
ISO 45001:2018

Reliable Project Delivery

Combining multidisciplinary expertise with responsive client service to provide efficient, professional and reliable support throughout the project lifecycle—from planning and approvals to implementation and ongoing compliance.

Sustainability That Creates Business Value

Practical, innovative sustainability solutions that help organisations reduce risk, improve performance and create long-term business value.

How We Support Your Project

Project Approvals & Sustainability Advisory

Helping projects move from concept to approval through practical environmental, social and sustainability solutions

Services include:

- Environmental & Social Impact Assessments (ESIA)
- Strategic Environmental Assessments (SEA)
- Stakeholder Engagement & Social Performance
- Climate Risk, Resilience & Sustainability Advisory
- ESG Strategy, Governance & Reporting

Project Readiness & Compliance

Helping organisations meet regulatory and lender requirements while strengthening investment readiness

Services include:

- **Due diligence** (identify risks)
- **Lender compliance** (meet financing requirements)
- **Permitting** (obtain approvals)
- **Management systems** (implement controls)
- **Compliance reviews** (verify performance)

HSE Supervision, Monitoring & Compliance

Supporting safe, compliant and uninterrupted project execution

Services include:

- HSE Supervision & Site Monitoring
- Environmental Monitoring & Compliance Monitoring
- Environmental Audits & HSE Audits
- Contractor HSE Management
- Permit-to-Work (PTW) Systems
- Occupational Health & Safety Advisory
- Incident Prevention & Risk Management
- HSE Training & Capacity Building

Sector Expertise

Every sector presents unique environmental, social, HSE and sustainability challenges. Our experience across high-risk industries enables us to deliver practical solutions tailored to each project's regulatory, operational and stakeholder requirements.

Oil & Gas

Supporting responsible development across the upstream, midstream and downstream value chain.

Transport & Logistics

Supporting infrastructure projects that connect people, markets and economic growth.

Mining

Balancing resource development with environmental stewardship, community engagement and regulatory compliance

Industrial & Manufacturing

Helping industrial facilities operate safely, responsibly and in compliance with environmental and HSE requirements

Project Experience

Supporting successful project delivery through practical environmental, social, HSE and sustainability solutions.

Proven Results Across Projects

350+

projects delivered across energy, mining, infrastructure, and industrial sectors

12+ years

of ESG, environmental, and HSE advisory experience

Zero

major HSE incidents across managed assignments

15,000+

stakeholders engaged across complex, multi-region projects

Project Experience

3D Seismic ESIA - Lindi & Mtwara

Sector: Oil & Gas Exploration

Challenge: Large-scale seismic acquisition across 736 km² required environmental approval while engaging stakeholders across 30 villages

Our Solution: Delivered ESIA, stakeholder engagement and regulatory support

Result: Regulatory approval secured within project timelines

Business Impact
- Enabled mobilisation across 30 villages.
- Reduced stakeholder-related project risks.
- Supported uninterrupted seismic operations.

HSE Advisory – Mnazi Bay Gas Drilling Operations

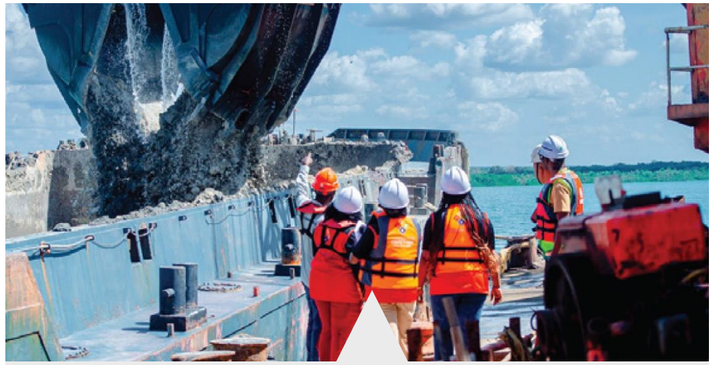

Sector: Oil & Gas | Upstream Operations

Challenge: Supporting safe, compliant drilling operations in a high-risk environment while ensuring operational continuity

Our Solution: Delivered on-site HSE supervision, PTW management, contractor oversight, compliance monitoring, and operational risk support

Result: Strengthened HSE systems and maintained regulatory and project compliance throughout critical drilling operations.

Business Impact:
•Supported safe and uninterrupted drilling operations.
•Strengthened contractor HSE performance and regulatory compliance.
•Reduced operational and HSE risks through proactive site supervision.

ESIA & Environmental Monitoring – Port Development, Mtwara

Sector: Ports & Marine Infrastructure

Challenge: Development of a major port and dredging project required environmental approvals while protecting sensitive marine ecosystems and maintaining regulatory compliance throughout construction.

Our Solution: Delivered integrated marine and terrestrial ESIA, environmental monitoring, and regulatory compliance support across the project lifecycle.

Result: Secured environmental approval and maintained regulatory compliance during project implementation.

Business Impact
•Reduced environmental and permitting risks.
•Enabled sustainable port development.
•Protected sensitive coastal and marine ecosystems.
•Supported uninterrupted project execution.

Project Experience

2D Seismic ESIA – Helium Exploration

Sector: Mining Exploration

Challenge: Securing environmental approval for a 2,964 km² multi-region helium exploration programme across diverse and environmentally sensitive licence areas.

Our Solution: Delivered integrated ESIA studies, stakeholder engagement, and regulatory support for multiple exploration licence areas.

Result: Secured environmental approval for the multi-region exploration programme within project timelines.

Business Impact
- Reduced multi-jurisdictional regulatory risks.
- Enabled expansion of helium exploration activities.
- Ensured compliance across diverse ecosystems.
- Increased investor and regulatory confidence.

ESIA – LPG Terminal & CBM Development, Tanga

Sector: Energy Infrastructure

Challenge: Securing environmental approval for a major LPG terminal and CBM infrastructure integrating offshore, subsea, and onshore facilities while managing complex environmental and safety risks

Our Solution: Delivered a comprehensive ESIA, environmental risk assessment, and regulatory support for the integrated energy infrastructure.

Result: Secured environmental approval, enabling the development of critical national energy infrastructure.

Business Impact
- Reduced environmental and operational risks.
- Supported national energy security objectives.
- Ensured compliance across complex infrastructure interfaces.
- Enabled timely project development and investment.

SEA – Industrial Park, Mtwara

Sector: Industrial Development

Challenge: Developing a 354-acre industrial park required a Strategic Environmental Assessment to align land use, infrastructure planning, and investment with environmental and sustainability goals.

Our Solution: Delivered a comprehensive SEA with environmental planning, policy alignment, and sustainability recommendations for the industrial park master plan.

Result: Aligned the industrial park development with national policies, environmental regulations, and sustainability frameworks.

Business Impact
- Reduced long-term environmental and planning risks.
- Supported structured industrial development.
- Enabled sustainable investment planning.
- Strengthened the project's long-term viability and regulatory confidence.

Organizational Capacity

Built to deliver complex ESG, ESIA, and HSE projects with confidence, speed, and reliability

Rapid Project Mobilisation

- Core team mobilised within 7 days
- Full deployment within 14 days
- Regional Delivery Capability

Multidisciplinary Expertise

•50+ specialists
•Engineers, Environmental, Social & HSE experts
•Registered professionals

Integrated Management Systems

•Triple ISO Certified
•QA/QC procedures
•HSE management systems

Commercial & Financial Strength

•Proven delivery of multi-phase assignments
•Sustainable business growth
•Reliable mobilisation capability

Eco Services

Integrated Project Delivery

One Project. One Lead Advisor. One Coordinated Delivery Team

Complex projects require multidisciplinary expertise and seamless regulatory coordination. Eco Services serves as your single point of contact, bringing together trusted specialist partners to streamline project delivery from planning through operation.

How We Coordinate Expertise

Client → Eco Services Lead Advisor → Specialist Partners → Integrated Delivery → Successful Project

Why Clients Choose This Model

Rather than managing multiple consultants independently, clients engage Eco Services as a single coordination partner, streamlining multidisciplinary project delivery.

Our Role

We don't replace specialist consultants—we coordinate them. Eco Services assembles the right expertise, manages technical inputs and interfaces, and provides quality oversight to ensure seamless project delivery. Clients benefit from a single point of coordination, clear communication, integrated execution, and consistent quality throughout the project lifecycle.

Specialist Expertise

- ✓ Engineering
- ✓ Architecture
- ✓ Geotechnical Survey
- ✓ Survey & GIS Services
- ✓ Hydrogeological Studies
- ✓ Environmental & Social Studies
- ✓ Land & Legal Advisory
- ✓ Regulatory Approvals & Permitting
- ✓ Energy & Utility Approvals
- ✓ Other Specialist Technical Studies

Client Benefits

- ✓ One Lead Advisor
- ✓ Faster Project Development
- ✓ Trusted Specialist Network
- ✓ Better Coordination
- ✓ Reduced Project Risk
- ✓ Quality Oversight
